How to Use the Data Dictionary	1-1
Variable Index	2-1
Data Dictionary	
Section I: Household ID	1
Section II: Risk Response	5
Section IV: Household Composition	20
Section V: Occupation	36
Section VII: Children Living Outside the	51
Section VIII: Residential Patterns	64
Section XI: Household Assets	76
Section XII: Agriculture Assets	83
Section XIII: Household Business	110
Section XIV: Housing and Landholding	151
Section XV: Expenditure	175
Section XVI: Income	181
Section XVII: Borrowing	204
Section XVIII: Lending	217
Section XIX: Saving	228
Section XX: General Questions	234
Section XXI: Hypothetical Situation	242
Section XXII: Institution and Organization	256

How to Use the Data Dictionary

Variable Name: Data item names are unique throughout the entire file. Most of variable names are sequential identifier such as LA1, LA2 indicating the question number on the questionnaire that the variable comes from. Some derived variables may be a mnemonic string of character such as CASEID or INITEM.

Label: The label is a short description of the data item.

Type: The data type indicates whether the data item is numeric (N) or character (C).

Position: The position of a variable in the Stata data file.

Question Num: The question number indicates the original question in the questionnaire, where the variable comes from.

Question Text: Text from the questionnaire is provided if the variable was obtained directly.

Frequencies & Means: For most categorical variables in the codebook, the counts and percentages of each variable in the data file are shown. For continuous variables, we provide descriptive statistics on minimum, maximum, mean, and standard deviation. The number of valid cases and missing cases are also shown for all variables.

Unique Values: A list of all of the possible non-missing values for the variable and the description of the values.

Unique missing data codes: There are five types of missing values:

For Numeric Variable	For String Variable	Missing Value Type
.a	RF =	refuse to answer
.b	DK =	don't know the answer
.c	NA =	not applicable
.x	IV =	invalid value
.y	MI =	missing value

.a or RF: The subject explicitly refused to answer the question or did not answer the question when he or she should have.

.b or DK: The subject was unable to answer the question, either because he or she had no opinion or because the required information was not available.

.c or NA: The subject was never asked the question for one reason or another. Usually this results from "skip patterns" that occur.

.x or IV: A response is inconsistent with related responses or is incompatible with response categories. The circumstances could be: interviewers/data-entry worker incorrectly record a response when recording or keying in the data.

.y or MI: Items should be filled out but have no data entry found. This is enumerator's own mistake and nothing to do with the respondent. The circumstances can be interviewers failing to ask a question or forgetting to record a response.

Resurvey - Household2003

Section I: Household ID

Data set name: hh03_01cvr.dta

Case count: 977

Variable count: 7

Size: 72,067 bytes

Variable Name: cvr1f
 Label: Team number
 Type: N
 Position: 1
 Survey/Derived: S
 Question Num: CVR1F
 Question Text: Team number

Unique Values / Codes	
<u>Value</u>	<u>Description</u>
1-4	number

<u>Value</u>	<u>Count</u>	Frequency	<u>Percent</u>
1	244		24.97
2	244		24.97
3	245		25.08
4	244		24.97
	-----		-----
	977		100.00

Valid cases = 977

Missing cases = 0

Variable Name: cvr7
 Label: relationship to head
 Type: N
 Position: 2
 Survey/Derived: S
 Question Num: CVR7
 Question Text: Relationship of Respondent to Head

Unique Values / Codes	
<u>Value</u>	<u>Description</u>
1	Head
3	Spouse
5	Brother or Sister
7	Son or Daughter
9	Son or Daughter in law
11	grandchild
13	parent
15	other relation and household member
17	not household member
.c	not applicable

<u>Value</u>	<u>Count</u>	<u>Percent</u>
1	572	58.55
3	267	27.33
5	3	0.31
7	86	8.80
9	20	2.05
11	3	0.31
